Invest In American Fluorspar Industry

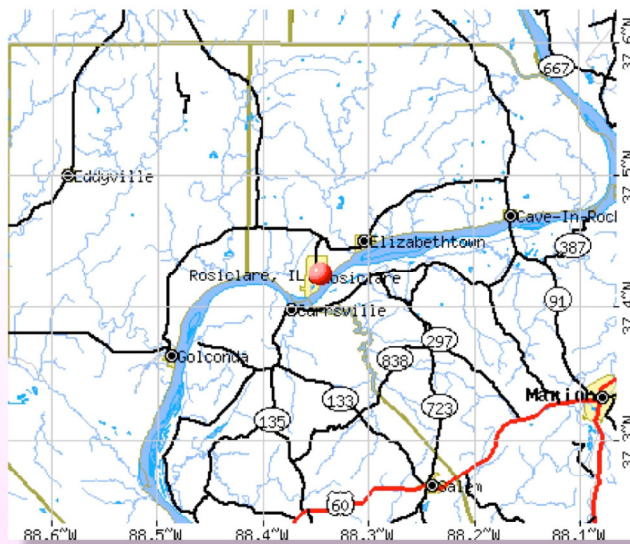

Fluorspar is an essential raw material in the basic chemical, steel and aluminum industries and in a growing number of high-tech green technologies and pharmaceutical applications.

Fluorspar has a growing economic and strategic importance. It is defined as a strategic mineral in the US with 100% net import reliance. Finally, Fluorspar is identified by the European Commission as a critical raw material facing a supply shortage.

ITSM goal is to grow the Fluorspar industry in the US through the discovery and development of mineral resources and to become a reliable long-term and competitive world supplier of high quality fluorspar.

ITSM also would like to acquire and develop large fluorspar deposits located close to established infrastructure and key markets in stable, democratic and mining friendly jurisdictions.

What does Rosiclare Illinois, USA have to offer to USA Fluorspar industry?

The vibrant community with a large mining workforce is very familiar with the Fluorspar mining process so they bring generations of experience and understanding.

ITSM
